Conduit Pipe Products Announces Addition of Stainless Steel Products

West Jefferson, OH.-January 31, 2018-Conduit Pipe Products, a US manufacturer of Galvanized Rigid Conduit, EMT and Aluminum accessories for the electrical market, announced today the addition of threaded stainless steel products to its line of quality fittings. The new line of stainless steel fittings includes, threaded and coupled pipe in 10 foot lengths, elbows, nipples and couplings. Conduit Pipe Products stainless steel fittings are UL listed and are available in SS304 and SS316 in sizes ½” through 4” and will be manufactured and shipped from our manufacturing facility in West Jefferson, OH. Conduit Pipe Products stainless steel fittings are manufactured with pipe polished to a bright finish.

“The addition of stainless steel fittings to our product line is a response to the changing needs of our customer base. Electrical contractors and end users across the country have relied on CPP for quality fittings for over 75 years, and the addition of stainless steel products allows us to further serve the needs of this growing industry” stated Ellen Robb, Conduit Pipe Products Sales Manager.

Conduit Pipe Products markets its products through high quality manufacturer representatives and a network of electrical distributors across the US and Canada.
