PRODUCT SPECIFICATION BULLETIN

CERTIFICATE of COMPLIANCE

STAINLESS STEEL FITTINGS – MSS SP-114

We hereby certify that the Class 150 and 1000 corrosion-resistant stainless steel fittings, manufactured by Camco Fittings Company conform to the requirements of the latest edition of MSS SP-114. We further certify that these fittings conform to ASTM/ASME A351/SA351 for castings and ASTM/ASME A/SA182, A/SA479, or A/SA 511 for wrought material.

We also certify that these fittings have been heat treated by the solution annealing method specified in accordance with the applicable material specification at a temperature above 1900 degrees Fahrenheit and then rapidly quenched in water to enhance the corrosion resistance and meet the mechanical properties. These fittings are capable of passing one or more of the corrosion tests specified in ASTM A/SA262.

We further certify that these fittings have been pickled and passivated in accordance with ASTM A/SA380. Camco Fittings' Class 150 and 1000 corrosion-resistant stainless steel fittings are manufactured and inspected in the United States of America.

These products do not include heavy metals (lead, mercury, cadmium, and hexavalent chromium) and brominated flame retardants (polybrominated biphenyls (PBB) or polybrominated diphenyl ethers (PBDE) and fully comply with the European Directive EU 2011/65/EC RoHS requirements. We further certify that these products fully conform to the low lead Safe Drinking Water Act of 2014 and NSF 61 requirements containing less than 0.25% lead.

These products are produced in accordance with the Capitol Manufacturing ISO 9001:2008 Certified Quality System Program. These products are inspected by independent quality control personnel conforming to the requirements of EN 10204 Section 3.1. These products were not exposed to mercury or any other metal alloy that is liquid at ambient temperatures during processing or while in our possession.
