Johndavid M. Nickel, P.E.

Awarded State of Louisiana Registered Professional Engineer (P.E.) License

We are pleased to announce that, on October 21, 2021, the State of Louisiana has issued a registered Professional Engineering (P.E.) license to Johndavid M. Nickel, Technical Services Engineer, Capitol Manufacturing Company, LLC. Johndavid earned his Bachelor of Science in Mechanical Engineering (BSME) degree from the University of Louisiana at Lafayette in 2016.

We are very proud of the tireless effort of Johndavid in meeting the educational training, practical design engineering experience, examination and qualifications required by the State of Louisiana to have earned his registered Professional Engineering license. Johndavid is Capitol Manufacturing Company's first staff mechanical engineer employee to receive a registered Professional Engineering license.

This is good news within our company, but even greater news to our customers, fabricators, equipment owners, and the general public, including those employed in Petrochemical industries.

Johndavid M. Nickel, Technical Services Engineer, P.E. adds further value to The Phoenix Forge Group companies' engineering & quality team and continues to insure the products we manufacture are of the highest quality, reliability and safety. Few, if any, pipe fitting, pipe nipple, swage nipple, bull plug, API coupling and UL conduit pipe products manufacturers have a registered Professional Engineer employee on their staff.

The Phoenix Forge Group is committed to providing customers with the highest technical engineering support, design verification, validation and field services.

Congratulations Johndavid!!

Larry Dildine, President

Guy Cuccio, Senior Consulting Engineer
